

MOVE IT OR LOSE IT!

Training Your Eye

Feb. 25-26, 2012

9:00 am to 4:30 pm

Continental Breakfast and Lunch provided

Presented by Janice Leonard, AKC Judge

Sponsored by the Arapahoe Kennel Club

This is a two day, hands on, seminar designed to give you the tools to relate the practical application of:

- YOUR BREED STANDARD
- YOUR DOG'S STRUCTURE AND TYPE
- YOUR DOG'S PEDIGREE
- SHOULD YOU BREED THIS DOG
- SELECTING WHO TO BREED TO AND WHY
- EVALUATING YOUR LITTER

This seminar is designed to get you involved in evaluating your dog, its structure and movement and compare that to the phrases in your breed's standard. You will measure, record and rate your dog's dimensions and compare that to the ideal for your breed. You will see a short video on movement where each dog shown is viewed in real time and then the same frames are viewed in slow-motion. You will compare advertised dogs to look for clues as to the actual virtues and weaknesses of the represented dogs. You will learn to chart your dog and possible dogs you may want to use in your breeding program. You will use the information earned and gathered to propose a breeding for your animal and also try to realistically predict what you should get and why. We will chart a litter of puppies and establish which ones to grow out and which ones missed the goals we had for this litter.

Come, bring your dog, have a good time learning about your dog's structure and movement, and find out why there are no blue dogs.

HELD AT ARAPAHOE CO. FAIRGROUNDS, 25690 E QUINCY AVE, AURORA, CO

Mail registration and fee to Linda Meng, 6398 Deframe Way, Arvada, CO 80004
